

RV GEL Battery

Overview

In short, silica turns the sulphuric acid into a jelly form inside a gel cell battery and is used as an electrolyte. Stronger of the lot, gel batteries can be used fluently in deep cycle applications, powering up a solar unit to an electric wheelchair, and more. The gel batteries have some downfalls, too; they cannot bear extreme. Maintaining a gel cell battery is hassle-free. Just ensure it is stored properly, and you are ready. Gel batteries are completely sealed and require no add-on maintenance like water removal. These batteries are far more. – This battery type doesn't need any maintenance, as it is well constructed with features to upkeep itself. – This battery doesn't spill, therefore. – Needs special chargers to charge – A slower rate of charging compared to a lead-acid battery. – Overcharging can cause internal damage and degrade the charging capability. – Prone to deteriorate slightly when exposed to.
