

## Service life of rooftop solar panels

### Overview

Solar panels are tough and durable devices: there are satellites in orbit that have been using the same PV cells for decades. Unlike most other generation systems, solar panels have no moving parts, and this means they aren't exposed to mechanical wear. However, even the best solar cells lose their generation capacity over. Unlike solar panels, which are installed above your roof with a racking system, solar shingles and tiles become a part of the roof. These products can be a great option for new homes. When checking solar panel specifications, you will notice that manufacturers actually offer two separate warranties: the product warranty and the power output warranty. Understanding the. High quality solar panels can be expected to last for 25 years or more, but other PV system components have shorter service lives. Solar inverters have a typical service life of 10 years. This.
